

# Year 11 Mock Review: Next Steps

Name.....

Form.....

Year 11 Mock Review: Use this Action Plan to highlight strengths and weaknesses in your progress so far and identify areas to work on. These need to be as specific as possible. It is likely that there will be a number of different areas to work on, including those subjects you are making good progress in.

When you have identified the areas to work on, consider what you can do in order to improve those areas.

## **Examples of actions you could take are:**

- To speak to teachers about areas of weakness and act on their advice
  - To make sure you have a revision guide for each subject
    - To complete exam practice papers
- Create a school work time table to organise homework and revision
  - Create a revision timetable and use it!
- Going over your notes and work from lessons after school each day
- Use planner more effectively to organise homework and deadlines
  - To attend regular support sessions at lunchtime or after school

Overview of current progress: It is important to look overall at your strengths and your weaknesses that can influence progress across different subjects.

**Main Strengths:** (Are there any subjects where you are already working at or above your target grade? Is there a particular area you have improved in since year 10? Is there a particular question you did well in? Can you identify what techniques and approaches you are using that are working well?)
